

SMOOTH HONEYCOMB POLYCARBONATE

DESIGNED FOR ROOF SYSTEMS

Polycarbonate is a polymer with excellent mechanical properties.

This product is adaptable to cladding panels, offering good thermal insulation, light transmission, resistance to loads and atmospheric agents.

DESIGNED FOR ROOF AND FAÇADE SYSTEMS

Ideal for DIY and professional projects.

Good light transmission.

Resistant to atmospheric agents.

SYSTEM BENEFITS

100% leak-proof.

Double UV protection.

Impact resistance.

Easy to install.

SMOOTH HONEYCOMB POLYCARBONATE

DESIGNED FOR ROOF SYSTEMS

TECHNICAL CHARACTERISTICS

Thickness (mm)	4	6	8	10	12	16	18	20
Nº of Walls	2	2	3	3	3	4	4	4
Weight (g/m ²)	0.8	1.3	1.4	1.6	1.7	2.6	2.7	2.8
Light Transmission (%)	84	82	79	76	74	70	68	66
Thermal U	3.9	3.6	3.1	2.7	2.5	2.2	2	1.8
Width (mm)	2100							
Length (mm)	6000							
Fire classification	B-S1, d0 EN 13501-1							
Refractive Index (n0)	>1.585							
Thermal Expansion (mm/m°C)	0.065							
Breaking strength (N/mm ²)	>70							
Resistance to bending (MPa)	>95							
Temperature variation (°C)	-40 / +120							
Protection UV	Both sides
